Chapter 1: Introduction	1
1.1 What is the purpose of these Guidelines?	1
1.2 Why do we need these Guidelines?	2
1.2.1 Impacts of urbanisation	2
1.3 Who should use the Guidelines?	4
1.3.1 Local government	4
1.3.2 Development industry	6
1.3.3 State government agencies	6
1.4 How to use these Guidelines	10
Chapter 2: Principles and Objectives	11
2.1 Victorian environmental policy and stormwater management	11
2.2 Urban stormwater management principles	12
2.2.1 Preservation, source and structural control	12
2.2.2 The treatment train approach	14
2.3 Stormwater performance objectives	14
2.3.1 Determining performance objectives	14
2.3.2 Application of objectives	17
Chapter 3: Stormwater Management Planning	19
3.1 Introduction	19
3.2 The risk management approach	20
3.3 Development of a stormwater management plan	21
3.4 The process	23
3.4.1 Stage 1: Preliminary activities	23
3.4.2 Stage 2: Risk assessment	27
3.4.3 Stage 3: Development of stormwater management plan	30
Chapter 4: Planning Controls	37
4.1 Introduction	37
4.2 Land-use planning	37
4.2.1 State Planning Policy Framework	37
4.2.2 Local Planning Policy Framework	39
4.2.3 Establishing a framework for stormwater management	40
4.2.4 Implementing the vision	41
4.2.5 Permit applications	43
4.2.6 Other controls	44
4.2.7 The importance of an integrated approach	45

Chapter 5: Water Sensitive Urban Design	47
5.1 Introduction	47
5.2 Benefits of water sensitive urban design	48
5.3 Site planning	50
5.3.1 Site analysis	50
5.3.2 Land capability assessment	50
5.3.3 Land-use plans	50
5.4 Residential design tools: index	51
5.5 Commercial and industrial design tools: index	59
5.6 Site construction management practices	62
Chapter 6: Source Controls	63
6.1 Introduction	63
6.2 Municipal operations	64
6.2.1 Planning of asset construction and maintenance	64
6.2.2 Source controls for maintenance activities: index	66
6.2.3 Training and staff awareness	78
6.2.4 Council source control checklist	80
6.3 Construction activity	82
6.3.1 Site management plans	84
6.3.2 Source controls for construction activities: index	85
6.3.3 Site management plan checklist	90
6.4 Business surveys	92
6.4.1 Stormwater pollutant surveys	92
6.4.2 Stormwater quality checklists for business	93
6.5 Education programs	94
6.5.1 Developing an education program	95
6.5.2 Educational tools and techniques: index	100
6.5.3 Examples of education programs	104
6.6 Enforcement	113
6.6.1 Roles and principles of enforcement	113
6.6.2 Who should enforce?	113
6.6.3 Enforcement powers of local government	114
Chapter 7: Structural Treatment Measures	117
7.1 Introduction	117
7.2 Selecting a stormwater treatment measure	117
7.2.1 Treatment objectives	118
7.2.2 Develop treatment train	119
7.2.3 Site identification	120
7.2.4 Short-list potential treatments	122
7.2.5 Compare potential treatments	123

7.3	Primary stormwater treatment	125
7.3.1	Summary of primary treatments	127
7.4	Secondary stormwater treatment	127
7.4.1	Summary of secondary treatments	130
7.5	Tertiary treatment types	130
7.6	Flow management	132
7.7	Primary treatment: index	133
7.8	Secondary treatment: index	171
7.9	Tertiary treatment: index	193
7.9.1	Constructed wetland systems	194
7.9.2	Design of wetland systems	200
7.10	Flow management: index	217
7.10.1	Objectives and principles of flow control	218
7.10.2	Flow management techniques	218
7.10.3	Flow management design tools	220
Appendices		229
Appendix A	Example of a litter trap action plan	229
Appendix B	Sizing of sediment settling basins	235
Appendix C	Sizing of filter strips and grass swales	239
Appendix D	Design guide for infiltration trenches	241
Appendix E	Design for extended detention basins	246
Appendix F	Design guide for sand filters	249
Appendix G	Derivation of constructed wetland sizing technique	251
Appendix H	Vegetation bands for wetlands	256
Appendix I	State Planning Policy Framework	257
